

INCUBA Science Park - Katrinebjerg

INCUBA Science Park - Katrinebjerg constitutes a part of Denmark's most powerful IT environment evolving at the IT-City Katrinebjerg. The many new and established companies are bent on developing products and services within the field of IT. This takes place in a neighbourly atmosphere in co-operation with the capable computer science and information and media science environments of the University of Aarhus.

In recent years, the IT City Katrinebjerg has successfully put itself on the IT map and contains an increasing number of intriguing companies; and there are serious plans of a continued expansion of the area. This also applies to the aspect of commercialisation of IT knowledge.

On Katrinebjerg, INCUBA Science Park has 13,200 square metres at its disposal.

How many square metres you rent will depend on your requirements. For a presentation of the scope and prices of the facilities, please contact:
